

Soil inclination measuring device

The set consists of an inclinometer with a 50 m long measuring cable and a rigged field computer which stores measurement data on site.

The device is used to measure soil inclination in inclinometer wells.

Manufacturer: itmSoil - United Kingdom

Inclinometer's technical data:

- Dimensions: 483 x 385 x 315 mm
- Metering cable length: 50 m
- Weight: 9,50 kg

Field computer's technical data:

- Dimensions: 184 x 91 x 38 mm
- Weigh: 590 g
